

Task 1 Submission

Deploy a Static Website on AWS S3

Intern Name	Shivang Saini
Candidate ID	IS-2026-9132
Organization	InternSpark Internship Program
Platform	Amazon Web Services (AWS)
Region	ap-south-1 (Asia Pacific — Mumbai)

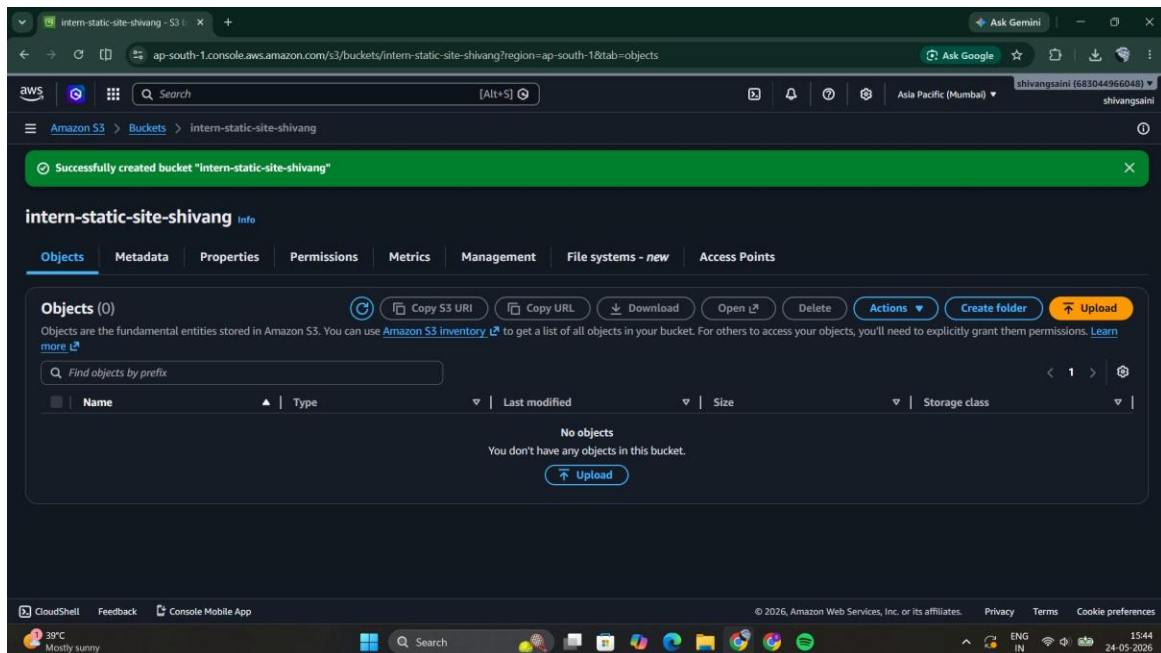

Objective

Host a static website using AWS S3 and make it publicly accessible via a public URL. This task demonstrates understanding of cloud object storage, static web hosting, and bucket permission policies.

Steps Taken

Step 1 — Create S3 Bucket

A new S3 bucket named intern-static-site-shivang was created in the ap-south-1 (Mumbai) region with static website hosting enabled.

Screenshot 1: S3 bucket successfully created — intern-static-site-shivang

Step 2 — Upload HTML File

An index.html file was uploaded to the bucket as the static website's entry point. The file contains a heading and confirmation message as required.

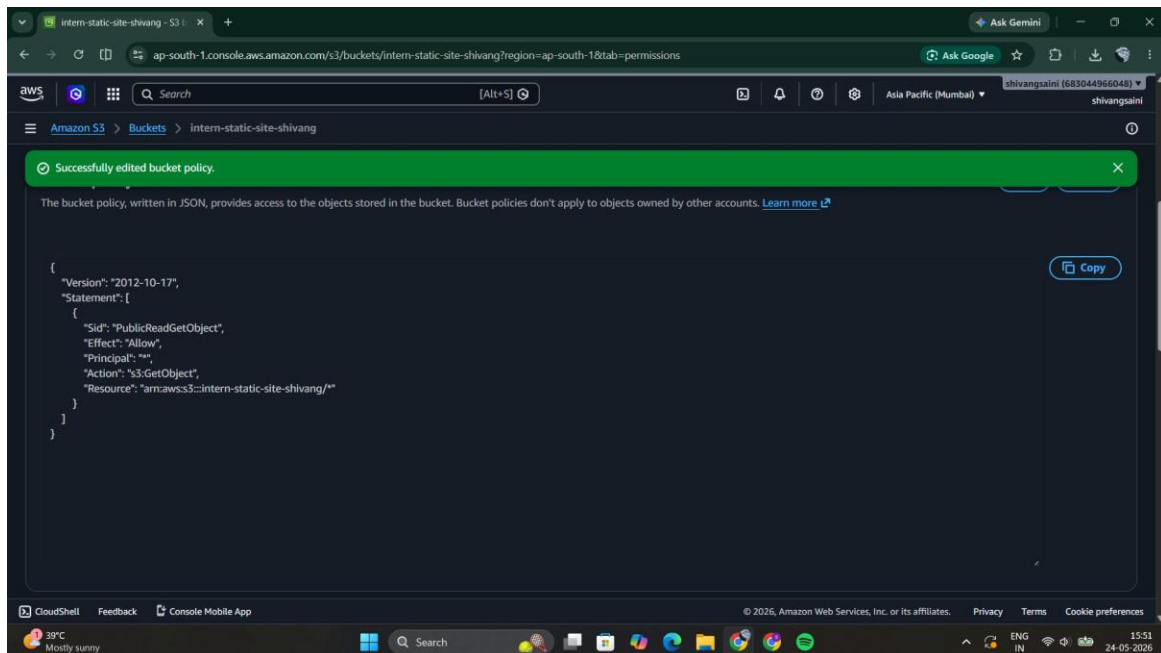

Step 3 — Enable Static Website Hosting

Under the bucket's Properties tab, Static Website Hosting was enabled with index.html set as the index document.

Step 4 — Set Public Bucket Policy

Block Public Access was disabled and the following bucket policy was applied to allow public read access to all objects:

```
{
  "Version": "2012-10-17",
  "Statement": [{
    "Sid": "PublicReadGetObject",
    "Effect": "Allow",
    "Principal": "*",
    "Action": "s3:GetObject",
    "Resource": "arn:aws:s3:::intern-static-site-shivang/*"
  }]
}
```

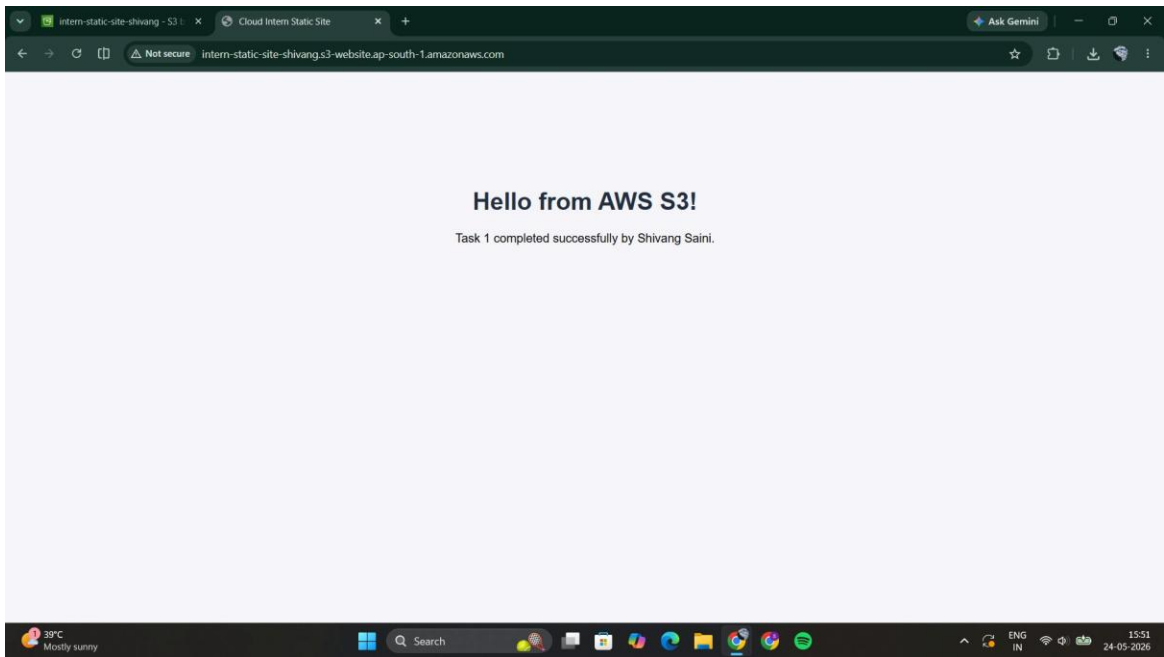

Screenshot 2: Bucket policy applied — Successfully edited bucket policy

Live Website

The website is publicly accessible at the S3 static website endpoint:

<http://intern-static-site-shivang.s3-website.ap-south-1.amazonaws.com/>

Screenshot 3: Live static website accessible via public S3 URL

Deliverables Summary

#	Deliverable	Status / Detail
1	S3 Bucket Created	✓ intern-static-site-shivang
2	Static Hosting Enabled	✓ index.html configured
3	Public Bucket Policy Applied	✓ s3:GetObject allowed for *
4	Live Website URL	✓ Publicly accessible
5	Screenshots	✓ 3 screenshots included
